Resource Person- Dr. Swapnil Shewale

No. of Students -25

Objectives- 1. To help students understand the structure and functions of Brain.
2. To enable students to see and study the model and charts of Brain.

Report:

A session on 'Understanding Brain' was organized by the Department of Psychology on Thursday 30th November 2023 at 8.45am in Room no 501. The session was conducted by Dr. Swapnil Shewale, Assistant Professor in Zoology and a young researcher in the area of Brain and its functioning. Around 25 students of First and Second year of Psychology attended the session. Dr. Shewale began with explaining the importance of Brain and then helped students understand its various structures and functions with the help of Charts and Models. Students of Psychology study Nervous System as a part of their syllabus and such session proved it beneficial for them in better understanding of it. The session ended with questions and answers.

Outcomes- Students could relate to the theory of the Brain structure and lead to better understanding of it.
